Words of Wisdom

Every human being is the author of his own health or disease.

- Sivananda

Health remedy:

Get in the sun to top up your vitamin D!

Fact: vitamin D is essential to recharge and maintain the human body.

Ever wonder why people smile more, are more active, and have a more positive, fun outlook to life in those sun drenched places, or over summer?

This is because vitamin D activates and promotes a healthy immune system, children's bone growth and helps in the prevention of other diseases such as cancer, chron's disease, hypertension, some rheumatoid arthritis and depression. Your body stores vitamin D, so the key is to make sure you get enough sun over the warmer months to keep your body going over winter.

Make sure you don't plonk yourself in the sun without warming up to it though. Start small with your exposure, 5-10 minutes over an afternoon break at work, and build up from there. Keep an eye on the UV levels, and slip, slop, slap and wrap. We encourage the use of UV Natural, a near natural sun lotion. For more information and information on where to purchase UV Natural visit www.uvnatural.com

Sun is energy, the world could not function without it, and the best part is it is free, so make the most of it, and get active this spring and summer.
